

WIZARD

This dialog allows the Assessor to generate the basic info (= template) for one or (usually) more assessments as part of the risk screening of several taxa for the Risk assessment area under study. This option is especially useful when starting an assessment 'anew', i.e. by creating a *New* database from the *Start – Database (tab)*. However, this dialog can be opened at any time in presence of an *Assessment List* from the *Main Assessment Workspace* populated with existing assessments. After generating the assessment template(s), a message is issued informing the Assessor that the operation has been completed. The assessment template(s) in the *Assessment List* will include the information provided for the *Category*, *Risk assessment area* and *Assessor*, whereas the entries for the entries for *Taxon name* and *Common name* will include an ellipsis '...' to be replaced with the appropriate information through the *New/Edit* dialog.

Risk screening details

Category

The terrestrial animal organism *Category* for which the assessment is being carried out: Mammals, Birds, Reptiles, Amphibians, Annelida, Insecta, Mollusca, Nematoda, Platyhelminthes, Other Arthropoda, Other Eukaryote taxa.

Risk assessment area

The Risk assessment area for which the assessment is being carried out. A limit of 40 characters (including spaces) applies. Text cannot be pasted into this field from the clipboard and neither the ellipsis '...' nor the following characters are allowed: \:*\?"<>| (checking of these requirements is handled automatically by a notification message issued to the Assessor whilst in edit mode).

Assessor

The name of the assessor carrying out the assessment. A limit of 40 characters (including spaces) applies. No pasting from the clipboard and neither the ellipsis '...' nor the following characters are allowed: \:*\?"<>| (checking of these requirements is handled automatically by a notification message issued to the Assessor whilst in edit mode).

Number of replicates

This control allows the Assessor to select the number of replicated assessment templates. The maximum number is 10,000, which is the maximum number of assessments that a TAS-ISK v2 database spreadsheet can include (see *Assessment List*). The number of possible replicate templates adjusts automatically depending upon the number of existing assessments (if any) in the *Assessment List*.

Help

Clicking this button opens the pdf Help file (TAS-ISK_v2_3_3_Help_Wizard.pdf) for the current dialog. Note that the TAS-ISK v2.3 Help files must be in the same folder as the TAS-ISK v2.3 program.

Cancel

Clicking this button closes the current dialog. If any changes have been made, then the Assessor is asked whether he/she wants to abandon them.

Save

Clicking this button saves the changes to the current assessment and database spreadsheet, and then closes the dialog. Active only if any changes have been made. Note that in case of an empty spreadsheet, the Save as dialog pops up for creating a new spreadsheet (see *Main Assessment Workspace – Database – Save As*).
